Pavankalyanr02@gmail.com ◇ [linkedin.com/Pavan Kalyan R](https://www.linkedin.com/Pavan Kalyan R)

OBJECTIVE

Dedicated and fast learner with a strong commitment to group support. Known for quickly grasping new concepts and contributing to team success by leading in front. .

EDUCATION

M.C.A. - Computer Applications,
RNS Institute of Technology, Bengaluru
CGPA : 8/10.

2025 - 2027

Bachelor of Computer Applications,
Shanthiniketan college of science and management studies, Ramanagara-562160
CGPA : 6.7/10.

2021 - 2024

SKILLS

Technical Skills : Java , Python, DSA in Python, SQL, Springboot, Hibernate and JDBC.
Web Tech - HTML , CSS And JS.

Soft Skills : Leadership, Teamwork, Time Management, Communication, Problem-solving, Adaptability.

PROJECTS

Hand Gesture Palm Rotation Controller (GUI-Based)

Key Skills: python OpenCV Mediapipe

Real-Time Hand Gesture Palm Rotation Controller (GUI-Based) Developed an interactive computer vision application that detects and visualizes hand gestures in real time using MediaPipe, OpenCV, and Tkinter. I extended an open-source hand tracking project into a GUI-based system with smooth palm rotation tracking and dynamic visual feedback.

Key highlights:

1. Accurate recognition of gestures like Open Palm, Fist, Peace Sign, Thumb Up, etc.
2. Real-time palm rotation tracking (0°–360°) with smooth updates
3. Clear visualization through a live GUI and HUD-style overlays

FLAPPY BIRD GAME

Key Skills: python pygame Object-Oriented Programming collision detection logic

Project Link: [Github - Flappy Bird Game](#)

Developed a fun and engaging 2D arcade-style mobile game inspired by Flappy Bird, where players control a bird navigating through a series of randomly generated obstacles. The objective is to survive as long as possible while scoring points by passing through gaps between pipes. The game was built using a modern game engine (such as Unity) and features smooth animations, realistic gravity-based physics, responsive touch controls, and dynamic obstacle generation to ensure an addictive gameplay experience. A scoring system tracks player progress, while sound effects and visual feedback enhance user engagement.

ASSESSMENTS / CERTIFICATION

- Data Science
Key Skills: Mathematics Statistics Python SQL Data Analysis Visualization Machine Learning
- Nasscom
Aggregate: 75 / 100
Key Skills: Edge Computing Cyber-security Internet of Things Big Data AIML
